DETAILED ACTION

1. This Office Action is in response to the Amendment filed June 14, 2005. Claims 15-20 were canceled and claims 1-14 and 21 are now pending.

Allowable Subject Matter

2. Claims 1-14 and 21 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The present claims are allowable over the closest references: Falkner et al. (US 5,789,153).

Falkner et al. disclose a method to quantitate nucleic acids in a sample by (a) adding given amounts of at least two known nucleic acid molecules to the sample as an internal standard, the standard nucleic acid molecules differing from the nucleic acid in the sample by at least one detectable characteristic, wherein at least two known nucleic acid molecules and the nucleic acid to be quantitated are amplified by the same primer, (b) carrying out the separation by means of a gel electrophoresis, (c) determining the amounts of the nucleic acid to be quantitated in the sample and the standard nucleic acid, and (d) determining the amount of the nucleic acid to be quantitated in the sample, wherein the primers contain fluorescent groups (abstract; col. 10, lines 18-25; claims 1 and 3). However, Falkner et al. do not teach or fairly suggest a method for performing electrophoresis comprising determining the property of a

plurality of sample fragments which collectively have a first range of sizes and are tagged with a dye selected from a first group of dyes by measuring the fluorescence spectra of the sample fragment-dye against a standard curve obtained by using a plurality of reference fragments collectively having a second range of sizes which does not overlap with the first range of sizes and being tagged with the common dyes.

In light of the above discussion, it is evident as to why the present claims are patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
